

Summer Series Virtual Run #3, June 2, 2020

Bellow are the results for the #3 virtualrun. This was a 3 mile predicted time run. Runners submitted a predicted time and ran a 3 mile distance. The difference between the predicted and actual was used to calculate a % difference.

One of the good things with this virtualformat (I know some of the club do not like virtual) is that we have some of our normal volunteers in the results.

The next run is a 4.5 mile team run. Will have to see if that is still virtual. I think the big step is for York County to go to Green. There are a few other considerations, but Green seems to be the big part. I will send a reminder for that run closer to the date and let you know how we will run.

If I missed anyone, please let me know.

Thanks

Kev
