

Summer Series #8 August 23, 2016

Finally some cooler weather and that brought some fast times for the 4 mile predicted time run tonight. This was a team run with teams determined randomly. Runners predicted their time prior to starting and then the actual time was use to calculate the difference. Teams times were then combined to find the final standings. With an odd number of runners, one was teamed with them self and time was doubled. Results below.

| Runner/Team | Predicted Time | Actual Time | | Difference | Team Difference | Place |

Since this was the last run in the summer series, we presented trophies to the 1st and 2nd place finishing woman and man.

First woman - Debbie Sullivan

Second woman - Bonney Busby

First man - Eric McGilvry

Second Man - Mike Flaherty.

Congrats to all the runners. Thanks to all who helped and supported this series.

One last bit of business. We wanted to do a quick vote for the attendance premium for those who completed 7 or 8 of the runs. If you could replay back with your choice of a vest, hoddie, or singlet I will tally the results and that will be the item we order.

Hope so see you all next year.
